

OVER 30 YEARS IN THE THEATER BUSINESS

Strong/MDI Screens meet the highest standard of quality in the industry.

Strong/MDI's screen plant in Joliette, Québec, Canada has an area of 55 000 square feet (over 5100 square meters).

Our unique paint tower and the equipment produce the best screens on the market.

The Strong / MDI Screens are shipped folded in a cardboard box; if you require any other method of shipment, be sure to specify the method on your order.

Strong / MDI Screens are designed to be installed with either springs or bungees.

SCREEN FRAMES

Every theater needs a good system to hang screens. Strong / MDI has developed a system with numerous advantages over the conventional structures. After several years of research and development Strong / MDI is now a leader in large format frame manufacturing.

- Available in depth of 24 or 36 inches (609 mm or 914 mm).

With 10 inches wide grooved drum
Capacity of 30 feet (9.1 m) of cable.

HD471K
With 10 inches wide grooved drum
Capacity of 30 feet (9.1 m) of cable.

HS471K
With sprocket (35B21).
Accepts #35 chain.

OTHER MDI PRODUCTS

RearView

The RearView cinema or theater rear projection screen offers an unusual high gain with a wide viewing angle. The specially textured surface reduces light wash out. The material width means fewer seam lines compared to other rear projection materials.

StudioView

Made of Bone PVC, the StudioView is used in live stages and studios as cyclorama and rear projection screens. The off white color is perfect for blending with scenic and costume elements.

Strong / MDI Screen Fixes

MDI Screen Fixes are a replacement for the traditional springs used to attach a cinema screen to the frame.

STRONG / MDI MANUFACTURES A VAST NUMBER OF CUSTOM AND SPECIALTY PRODUCTS

Domino screens

- Screening rooms
- Schools
- Home theatre

Micro-perforation screens
